

$a: z \mapsto z + 1$ on every block; $c: z \mapsto z + m_u$ on B_u , $m_u = g^{e_u}$; $x^3 = 1$ forces x to permute blocks by σ , $\sigma^3 = 1$

$x^3 = \text{id}$ on the triple iff $m_w m_x m_y \equiv 1$ iff $e_w + e_x + e_y \equiv 0 \pmod{T}$ iff $s(w) + s(x) + s(y) = B$
